Welcome to The Mourne Collection, dedicated to crafting exquisite fireplaces and stoves inspired by the rugged beauty of the Mourne Mountains. Just as these majestic peaks stand as a testament to nature's grandeur, our brand stands as a beacon of craftsmanship and design. With a commitment to quality and the art of cozy living, The Mourne Collection invites you to bring the essence of Co. Down's stunning landscapes into your home. Embrace the warmth, style, and comfort, as you embark on a journey to create inviting spaces that capture the essence of the Mourne Mountains.

STOVES

All Mourne Eco stoves have been designed with the environment in mind, are easy to maintain, and constructed to the highest standards.

The premium steel construction of the stove bodywork is completed with a stylish and contemporary door.

All Mourne stoves have been independently tested in Netherlands to ensure they meet and exceed all current standards for safety and emissions criteria, including Eco Design criteria.

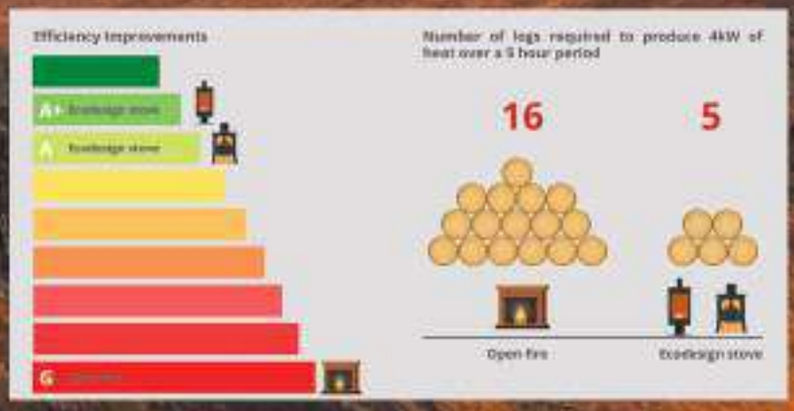

Clean Burn

Ecodesign Ready stoves have been engineered to burn wood more completely thus reducing particulate matter (organic particles that come from incomplete combustion of the fuel).

The Mourne Eco stoves feature targeted introduction of combustion air at higher levels in the fire box, reigniting the particles of smoke before they can leave the stove.

More Efficient

As well as greatly reducing the emission of particulate matter, Mourne Eco stoves are also more efficient, reducing the amount of fuel you need to use in the stove, maximising heat output and saving you money.

Did you know...

Each tree absorbs the same amount of carbon dioxide when growing as it releases when burned.
So if you use wood as your fuel source in one of our Mourne Eco stoves and source your wood locally from sustainable woodlands the appliance is close to carbon-neutral.

Be sure to look out for Woodsure's 'Ready to Burn' logo to easily identify firewood that has a moisture content of 20% or less. This not only produces more heat than wet wood but also reduces air particulate matter.
